SUMMARY

Third year BS Information Technology student at the University of Pangasinan with hands on experience building AI-Integrated and full-stack applications. Proven ability to lead end-to-end development of LLM-powered platforms including scam detection systems using fine-tuned BERT models across web and mobile. Eager to contribute to software development and AI/ML engineering teams with challenging internship environment

TECHNICAL SKILLS

Languages: Python, JavaScript, Kotlin, PHP, SQL

Frameworks & Libraries: React, Django REST API, Flutter, BERT (Hugging Face)

Databases: MongoDB. MySQL

AI/ML: LLM Integration, Generative AI, Fine-tuned Classification Models

Tools & Platforms: Git, GitHub, REST APIs, Android Studio, VS Code

RECENT PROJECTS

Verif-AI (Project Manager, Lead Developer) November 2025 – March 2026
React, Django, MongoDB, BERT, LLM, Generative AI

- Architected and led full-stack development of a web platform that enables users to submit suspicious messages for AI-powered scam analysis. Integrating a fine-tuned BERT model that classifies messages across multiple scam categories with high accuracy
- Integrated a generative AI chatbot layer that delivers personalized, context-aware guidance to users based on the analyzed message supporting victims in understanding and responding to their situation

Bimby (Artificial Intelligence Engineer) July 2025 – October 2025
Flutter, React, Django, MongoDB, LLM, BERT

- Engineered a real-time message scanning pipeline within a cross-platform mobile app that automatically detects potential scam content before the user reads it, using a locally run BERT-based classification model
- Integrated a conversational AI chatbot allowing users to escalate flagged messages for deeper analysis and step-by-step guidance reducing user risk through proactive, AI-driven support

Upang BookTrack (Lead Developer) January 2025 – April 2025
Kotlin, PHP, MySQL, JavaScript

- Led the development of a full-stack library management system featuring a Kotlin-based Android app, PHP REST backend, and MySQL database, handling book cataloguing and student borrowing records

EDUCATION

University of Pangasinan Dagupan City, Pangasinan
Bachelor of Science in Information Technology *Expected Graduation: 2027*

St. John's Cathedral School Dagupan City, Pangasinan
Senior High School *2020 – 2023*

- Dean's Lister — January 2023, March 2023, May 2023

CERTIFICATIONS

AI Beginners Guide (simplilearn) April 4, 2026
Data Analytics with AI (sololearn) March 11, 2026
